This catalog is dedicated to our professional paint customer. Inside, you will find everything you need to complete your job to your high standards. **Thank you for choosing Dunn-Edwards.**

An Environmentally Conscious Paint Company

A green legacy, a greener future

At Dunn-Edwards, our mission has always been to develop the best-performing paint in an environmentally sound manner to protect the health and well-being of our customers. From the beginning, being green has been at the core of our business practices. From our ingredients, to labeling, to our LEED® Gold-certified paint manufacturing facility, we strive to continue our green legacy and provide you with eco-efficient products.

Products bearing this logo are EG-FREE™ and TAC/HAP-FREE

Ethylene glycol (EG), a solvent often used in water-based paints, is listed as a Toxic Air Contaminant (TAC) and Hazardous Air Pollutant (HAP). In 1983, we were the first in the industry to voluntarily replace EG with propylene glycol, a nontoxic alternative “generally regarded as safe” by the FDA. Also, every Dunn-Edwards product with the EG-FREE logo is formulated without any other TAC or HAP.

VOC and RAVOC ratings on every label

Dunn-Edwards was the first paint company to label its products with RAVOC ratings (reactivity-adjusted VOC content), a better way to measure potential air quality impacts of coatings. To learn more about RAVOC ratings, visit dunnedwards.com/RAVOC

LEED Gold-certified paint manufacturing facility

In 2011, Dunn-Edwards opened the world's first LEED Gold-certified paint manufacturing facility in Phoenix, AZ. Encompassing manufacturing, product development, quality control and more, the 336,000-sq.-ft. facility was designed to be the greenest in the industry.

The Dunn-Edwards Experience

The leading paint manufacturer in the Southwestern United States since 1925, we are committed to providing the superior products and services that our customers have come to expect.

The Brand Preferred by Consumers and Professionals Alike

As a painting contractor, your business depends on your reputation. That's why you choose quality paint. We understand this, and it's why Dunn-Edwards paints are formulated using only the highest-quality ingredients for optimal performance.

Your Success Is Our Priority

At Dunn-Edwards, professionals like you are our business, so we offer—in addition to superior paint and supplies—a wide range of services to help you complete your projects successfully, serve your customers effectively, and grow your business.

Pro tools on dunnedwards.com

Discover resources from finding a representative, product specifications and paint problem-solving to color tools and paint-color archive—and a whole lot more.

150+ locations

Find the nearest store wherever you are with more than 150 locations in California, Arizona, Nevada, New Mexico and Texas. Also, order paint and supplies on our website, available for in-store pickup or delivery anywhere in the United States. *(See page 113 for store locations)*

Dunn-Edwards inspires confidence in your customers' color choices

Personalized Color Services

Choosing colors can be a daunting process and can slow a project down. Keep your projects moving by referring your customers to a Dunn-Edwards Professional Color Advisor. This in-store service is complimentary and is also available in-home and online, offering personalized color-selection guidance with a professionally trained and certified color expert who will work directly with your customers to help them select from 2,006 colors in the Dunn-Edwards Perfect Palette® system. So your customers are confident in their color choices—and you stay on schedule.

dunnedwards.com/professional

Find designer-curated palettes, color trends and digital paint swatches—and even order color samples here.

Professional services designed to help you succeed

Painting Contractor Services

We recognize that our relationship with painting contractors is based on more than what's in a can of paint, and we stand ready to provide products and services to support your business.

Besides offering high-quality paint and supplies, we also provide a wide range of professional services to support your business, grow your customers, and help you succeed.

Online Services Highlights

- :: **My Account** Order products, track projects, access customizable marketing tools, plus a lot more—for FREE!
- :: **Find a Paint Pro** Register on our contractor directory, and allow us to promote your business to our website visitors
- :: **Store Locator** Find the nearest store with more than 150 locations in California, Arizona, Nevada, New Mexico and Texas
- :: **Green Building Paint Guide** Designed to assist in developing projects with a green focus
- :: **Specification Guide** Proper coating system recommendations for 13 project types ranging from CHPS to tract homes
- :: **Product Data Sheets, Safety Data Sheets and Product Conformance Table**
Everything you need to know about our products, from technical specifications to safe handling practices
- :: **Paint Problem Solver** Identify common paint problems and find solutions to fix them
- :: **Technical Bulletins** Common paint-industry topics include substrate concerns, best practices, and environmental and regulatory issues

The In-Store Services Experience

- :: Save time with our FREE jobsite delivery service
- :: Get to your jobsite quicker with our Early Bird service
- :: Save time with our one-hour color-matching service
- :: Pick up brushes, rollers, tape, tools and a lot more
- :: Get equipment repairs and rentals at select locations
- :: Refer your customers to our FREE color consultation service
- :: Order ahead, and your mixed paint will be ready when you arrive
- :: Attend our frequent product demonstrations and application trainings
- :: Rely on any of our field Sales Representatives or in-store associates for expert coatings advice
- :: Learn about financing options in any of our 150+ stores *(See page 113 for store locations)*
- :: Reduce, reuse, recycle your unwanted coatings through our partnership with PaintCare (CA only)

Digital solutions to help you manage and grow your business

My Account

With a **FREE web-based Dunn-Edwards My Account**, you'll have exclusive access to business-management tools that allow you to track projects and order paint and supplies online. And our business-building tools can help boost your visibility in the marketplace, such as customizable marketing materials and our Find a Paint Pro contractor directory. Plus, Dunn-Edwards InstaColor offers a range of color tools that enable you to virtually paint walls for your customers.

Go Mobile!

Access everything on dunnedwards.com 24/7 from any location using your smartphone. Here, you'll find a multitude of tools to help you run your business and obtain product information. Log in to My Account, then download Product & Safety Data Sheets and Technical Bulletins, snap a photo, then match a color in the Dunn-Edwards Perfect Palette system, and more.

Instant Savings

Dunn-Edwards now offers instant savings on many of our paints and supplies, delivered right to your phone. Simply text 'Instant Savings' to 888-337-2468 for exclusive coupons and sales alerts.

Dunn-Edwards InstaColor®

Capture what inspires you with a set of tools you'll find exclusively at dunnedwards.com

Using our Visualization Tool, you can access any of the 2,006 colors from the Dunn-Edwards Perfect Palette system and virtually paint the walls of your own photo or choose one from our gallery. And instantly match, collect and share colors using a Dunn-Edwards InstaColor iD device and your smartphone.

With over 10,000 color match options providing the most accurate results—including 2,006 Dunn-Edwards Perfect Palette and other national brands—you're sure to find the right color for the job!

Specialized solutions and services

Commercial Program: superior coatings and support

Dunn-Edwards has a complete line of product solutions that meet the unique requirements of commercial projects, and our team of experts can design a coatings system for any project's substrates that meets all durability and performance expectations.

- :: **Trained experts** provide job walks, product expertise, technical advice and everything else needed to meet your project needs
- :: **Specialized services**, such as free jobsite delivery, keep your crew on the jobsite, and professional color renderings help you visualize colors on projects
- :: **Business solutions** that enable easy management of invoices and transaction tracking, and archiving of products, colors, notes and images by project
- :: **Comprehensive product specifications** that help ensure a project's success

Industrial coatings experience and expertise in service environments

Dunn-Edwards is proud to deliver product solutions for any service environment. Our NACE-certified coatings and substrate experts are available to work with you from surface prep through coating selection.

- :: **Expert Technical Services** Specifications, substrate review and failure analysis
- :: **AIA MasterSpec** Streamline comparative evaluations
- :: **Tinting Capabilities** 30 tinting locations for industrial and high-performance coatings
- :: **Industry Associations** NACE is now AMPP, The Association for Materials Protection and Performance, combining the best of both the National Association of Corrosion Engineers (NACE International) and the Society for Protective Coatings (SSPC). We are an affiliate member.

DUNN-EDWARDS FEATURED COATINGS

Deluxe Interior Paint

EXQUISITE®

Beautifully presented
Perfectly preserved

EXQUISITE is a revolutionary, new interior matte paint featuring ChromaStay Technology that makes it truly washable while being stain, scuff, burnish and color rub-off resistant. ChromaStay Technology is a combination of proprietary technologies, including Ceramic Technology, that provides exceptional durability to Dunn-Edwards coatings.

EXQUISITE is easy to apply and is ideal for use on high-end custom projects where ultra-low VOC products are preferred.

Exceptional Stain Resistance

The deluxe properties of EXQUISITE will shield walls and keep staining agents in check. With a few wipes of a sponge, those stubborn stains will disappear with ease.

Exceptional Washability

With EXQUISITE, walls can never be rubbed the wrong way. It's formulated to keep the color right where you painted it the first time, even after repeated cleaning.

Unrivaled Scuff Resistance

Beautifully painted walls can only take so much scuff. The revolutionary technology in EXQUISITE makes it tough on scuff and protects walls from marks and scratches that come with everyday life.

Burnish & Color Rub-off Resistant

Wall color is only as good as the paint that protects it. The shine left behind after a good cleaning can make walls an eye-catching masterpiece for all the wrong reasons. EXQUISITE will preserve the wall's first, true color and make fading a thing of the past.

Ultra-Premium Interior Paints

EVEREST®

Performance,
style and beauty

EVEREST is a complete line of ultra-premium, low odor, Zero VOC, self-priming, 100% acrylic paints ideal for use on high-end projects. It applies easily and features exceptional hide and superior stain resistance, washability and adhesion.

Why EVEREST outperforms the competition

- :: Formulated using ultra-premium resins and pigments that provide exceptional performance, including hide, adhesion and sheen uniformity
- :: Self-priming on previously painted and properly prepared surfaces*
- :: Virtually no odor during or after application; perfect for painting occupied spaces
- :: Great flow & leveling for an even, uniform finish

**Self-priming on most surfaces (see Product Data Sheet for details). For previously painted surfaces that are properly prepared as needed, one (1) coat may be sufficient. For properly prepared new surfaces, two (2) coats are typically required.*

Ultra-Premium Interior Paints

SUPREMA®

Superior performance
for high-end interiors

SUPREMA is a complete line of ultra-premium, ultra-low VOC, acrylic latex paints that combine exceptional hide with superior durability, washability and block resistance. It is ideal for use in any interior setting where superior performance is required.

Why SUPREMA outperforms the competition

- :: Formulated using the highest quality resins to provide better scrub resistance, improved block resistance, and superior flow & leveling
- :: Better block resistance is achieved through tougher resin particles, creating a harder finish
- :: Excellent flow & leveling comes from a special thickening agent that interacts better with the resin
- :: Applies easily and dries to a smooth, uniform finish

Premium Interior Paints

SPARTAWALL®

Superior hide
and durability

SPARTAWALL is a complete line of premium acrylic interior paints. It is formulated to provide a tough, durable, block-resistant finish that is easy to apply.

Why SPARTAWALL outperforms the competition

- :: Formulated using high quality resins and pigments that withstand repeated washing
- :: Superior block resistance
- :: Easy to apply and dries to a smooth, uniform finish
- :: Very low odor and Zero VOC* content

Premium Interior Paint

SPARTAZERO®

Dead-flat finish
and zero VOC

SPARTAZERO is a premium interior, low odor, Zero VOC paint that provides exceptional hide, durability and performance. It is ideal for use on residential and commercial projects, schools, hospitals and hotels, and any application where a low odor product is preferred.

Why SPARTAZERO outperforms the competition

- :: Formulated using the highest-quality paints and pigments to provide better scrub resistance
- :: Dead-flat finish
- :: Minimal roller spatter

Professional Interior Paints

ACRI-WALL®

Paint that works
as hard as you do

ACRI-WALL is a line of professional, Zero VOC, low odor interior paints ideal for use on multi-tenant housing projects. ACRI-WALL exhibits very good touch-up, sheen uniformity and hide. It can be used on properly prepared and primed masonry, wood and metal, and is self-priming on new drywall.

Why ACRI-WALL outperforms the competition

- :: Formulated using the right blend of pigments, binders and thickeners that provide excellent sheen uniformity, touch-up and durability
- :: Zero VOC, low odor
- :: Very good touch-up and block resistance
- :: Self-priming on new drywall (first coat)

Ultra-Premium Exterior Paints

EVERSHIELD®

Outperforms,
outlasts, outshines

EVERSHIELD is a complete line of ultra-premium, ultra-low VOC, 100% acrylic paints ideal for use on high-end projects where superior performance and durability are required.

Why EVERSCHILD outperforms the competition

- :: Formulated using advanced technology and premium ingredients that provide unparalleled performance, durability, coverage and adhesion
- :: Ultimate protection against moisture penetration and UV color fade
- :: Exceptional dirt pick-up resistance
- :: Outstanding gloss retention
- :: Superior non-blocking properties

Ultra-Premium Interior/Exterior Paints

ARISTOSHIELD®

Superior balance
of hardness & flexibility

ARISTOSHIELD is an ultra-premium, ultra-low VOC, interior/exterior paint formulated with advanced water-based urethane alkyd technology for an oil-like finish. It is ideal for use on high-end projects where superior performance and durability are required.

Why ARISTOSHIELD outperforms the competition

- :: Superior balance of hardness and flexibility
- :: Can be used as a direct-to-metal coating on properly prepared surfaces
- :: Excellent flow & leveling, which forms a durable, uniform finish
- :: Superior non-yellowing properties compared to other alkyd emulsion paints

Interior Cabinet, Door and Trim Paint

DECOGLO®

Durability meets excellence

DECOGLO is an ultra-premium, semi-gloss, interior, ultra-low VOC, urethane modified acrylic cabinet, door and trim paint. It is ideal for use on properly prepared interior wood substrates, including furniture. Together with DECOPRIME* primer, this paint and primer system is designed to provide exceptional durability.

Why DECOCLO outperforms the competition

- :: Exceptional film hardness
- :: Scuff and chemical resistant
- :: Fast drying and block resistant
- :: Excellent flow & leveling

See the difference

SCUFF RESISTANCE: DECOCLO outperforms competitor products in scuff resistance, which can be defined as the physical damage that typically occurs on the surface of the topcoat.

Test Method: On a 2' x 2' or similar unprimed drywall divided into two sections, 2 coats of the test paint and competitor are applied using a roller with 3/8" nap. The paint is then allowed to dry for 7 days at ambient conditions. Next, using different materials, run mar-resistance tests by holding the objects at an angle against the painted surface and running them down or across the painted surface with constant pressure and speed. After the test is completed, assess the panels for the degree of mar/scratch visibility of each material tested. Lastly, using a sponge soaked with Fantastik solution, clean the marked middle section of the panel with the intent to show the ease of removing the different scuff marks. Using fingernails, DECOCLO and the National competitor test samples were scuffed with oak, nylon, aluminum, glass and brass, which are some commonly used materials to test scuff resistance at the laboratory.

OAK
NYLON
ALUMINUM
GLASS
BRASS
FINGERNAIL

National Brand

BLOCK RESISTANCE: When two painted surfaces come into contact, such as a door and door jamb, they can stick together, or block, and paint can peel from the surface. DECOCLO clearly beats the National Brands, as their paints are sticking together and peeling from the surface.

Test Method: After the coating has cured, the panel is tested by cutting out two 1.5" squares and placing the panels face to face so that the coated surfaces of each square are together. The squares are then placed on a glass plate and a rubber stopper and 1,000-gram weight are placed on top to provide a standardized amount of force to the surface. The applied force of the coated surfaces is allowed to sit for the following length of time for each condition before trying to pull the two panels apart: (1) Room Temperature – 24 hours; (2) Elevated Temperature – 30 minutes. The weight is removed and the panels are allowed to equilibrate for 5 minutes before separating the panels.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the Corporate Office by appointment.

Elastomeric Wall Coatings

ENDURALASTIC® 10 & ENDURALASTIC 5

Flexible,
crack-bridging
performance

Flexible, long-lasting performance

ENDURALASTIC 10 is an ultra-premium specialty, 100% acrylic elastomeric wall coating that provides superior performance and exceptional durability for masonry surfaces.

Flexible, durable performance

ENDURALASTIC 5 is a premium specialty, 100% acrylic elastomeric wall coating that provides excellent performance and great durability for masonry surfaces.

Why ENDURALASTIC 10 outperforms the competition

- :: Superior elasticity and elongation
- :: Excellent crack-bridging properties
- :: Waterproofs against wind-driven rain
- :: Great dirt pick-up resistance

Why ENDURALASTIC 5 outperforms the competition

- :: Excellent elasticity and elongation
- :: Very good crack-bridging properties
- :: Waterproofs against wind-driven rain

Light-Duty Industrial Coating

ENDURA-COAT®

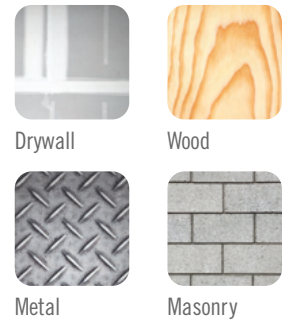

Corrosion resistant
maintenance coatings

ENDURA-COAT is a line of interior/exterior high-performance, low VOC, water-based, acrylic industrial maintenance coatings with excellent adhesion and corrosion resistance. It can be used on properly prepared and primed metal, wood, masonry, plaster or drywall. *For professional use only.**

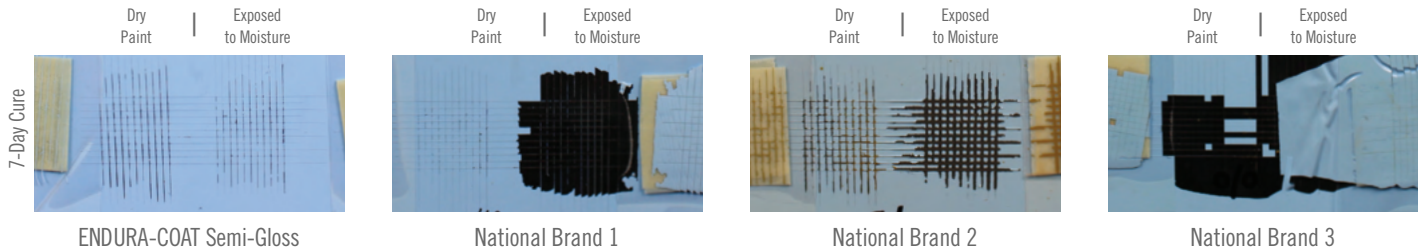

Why ENDURA-COAT outperforms the competition

- :: Outstanding corrosion resistance and adhesion
- :: Direct-to-metal application

ADHESION:

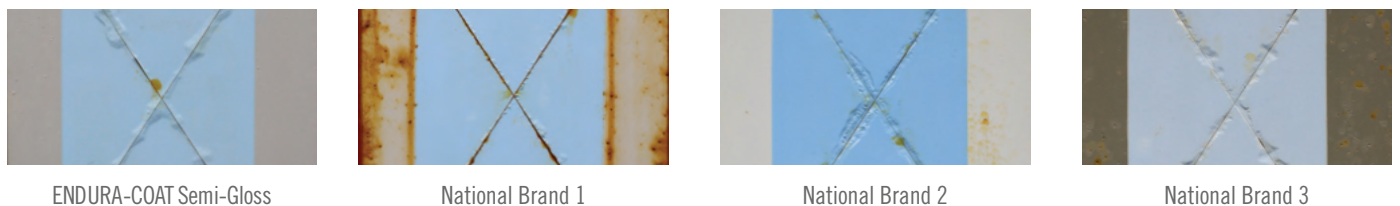

Good adhesion means the paint sticks to the substrate, allowing for better protection of the painted surface. ENDURA-COAT does a better job at sticking to steel, as the competition is more prone to peeling, especially when exposed to moisture.

Test Method: Paint is applied using a 3 mil drawdown to a standardized substrate and allowed to dry for 24 hours at room temperature. After 24 hours, two crosshatch patterns are made, one on the left for dry adhesion and one on the right for wet adhesion. A paper towel is then cut into 1" x 1" squares and allowed to soak into the film for 10 minutes and then removed and the test area is blotted dry to remove excess water. The film is allowed to dry for 30 minutes. A permacel tape is then cut into approximately 3" long pieces and placed in the center of the crosshatch and smoothed out. The tape is then removed by seizing the free end and pulling it off rapidly back upon itself at an angle as close to 180 degrees as possible. The process is repeated on the dry adhesion crosshatch. After the tape is removed the crosshatches are evaluated and rated.

ACCELERATED CORROSION:

In comparison tests, we applied ENDURA-COAT and leading competitors on steel. ENDURA-COAT clearly beats the National Brands, as their paints show significant rust and corrosion development.

*For professional use only. Not for residential use in California.

Light-Duty Industrial Coating

ENDURACAT[®]

Chemical resistant
for extra durability

ENDURACAT is a high-performance, ultra-low VOC, pre-catalyzed, water-based, single-component interior epoxy intended for use where extra durability and chemical resistance is required.

Why ENDURACAT outperforms the competition

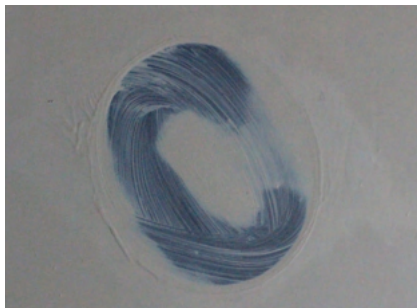

- :: Excellent chemical and stain resistance
- :: Superior adhesion
- :: Mold and mildew resistant

CHEMICAL RESISTANCE:

In testing versus competitors, ENDURACAT shows superior resistance to film damage such as blistering and peeling when exposed to harsh chemicals.

ENDURACAT Semi-Gloss

NATIONAL BRAND

Test Method: The test coating is applied to white scrub panel with a 3 mil bird bar and cured for 7 days. After 7 days, the panel is tested for its chemical resistance to Fantastik, isopropyl alcohol, and bleach. Each chemical is applied using a 1 inch doubled over cheesecloth soaked with 1 mL of solution. The cheesecloth is placed over the index finger and the panel is rubbed for 50 cycles in a circular motion. After chemicals are applied the film is examined for any lifting, wrinkling or other defects. Picture shown above demonstrates the results of testing for a solution of 70% Isopropyl alcohol.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the Corporate Office by appointment.

Interior/Exterior Metal Primer

BLOC-RUST®

Protects metal surfaces from moisture

BLOC-RUST Premium is an ultra-low VOC rust-preventative primer offering excellent corrosion resistance and adhesion on interior and exterior metals, except for galvanized steel.

Why BLOC-RUST Premium outperforms the competition

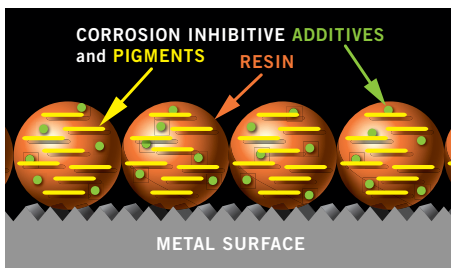

- :: Formulated with corrosion inhibitive additives and pigments that prevent metal corrosion
- :: Formulated with advanced waterborne alkyd resin technology, which improves hide and adhesion to metal
- :: Easy to apply, dries fast and water cleanup

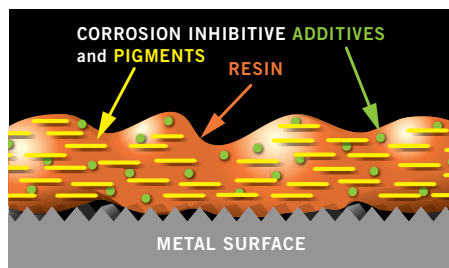

Metal

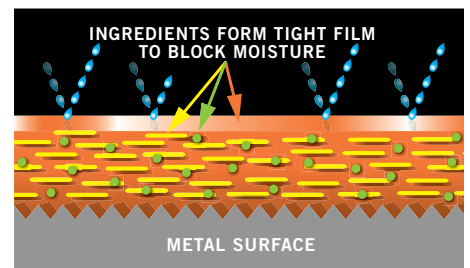

See the SCIENCE of RUST PREVENTION:

Primer applied to ferrous or non-ferrous metal

Superior resin containing corrosion preventive pigments and corrosion inhibitive additives work together to help prevent corrosion of the metal substrate

Resin and pigments form a tight, uniform non-porous film that prevents water from reaching the metal surface, thus preventing corrosion

These diagrams are not designed to scale and are simplified to illustrate what is happening on a microscopic level.

Interior/Exterior Multi-Surface Primer

ULTRA-GRIP®

Multi-surface primer
with superior adhesion

ULTRA-GRIP Premium is an ultra-low VOC, acrylic, multi-surface primer designed for a wide range of interior and exterior applications. It provides excellent adhesion to properly prepared drywall, wood and masonry, as well as hard-to-stick surfaces, such as aged alkyd surfaces, aluminum, galvanized metal, vinyl, fiberglass and select plastics. ULTRA-GRIP Premium has outstanding stain-blocking, strong tannin resistance, great hide and excellent enamel holdout. It applies smoothly and dries fast.

Why ULTRA-GRIP Premium outperforms the competition

- :: Excellent adhesion to a wide variety of surfaces
- :: Outstanding stain-blocking
- :: Strong tannin resistance
- :: Great hide and excellent enamel holdout
- :: Ultra-low VOC content

Drywall

Wood

Metal

Masonry

ADHESION:

Paints that exhibit good wet and dry adhesion are better able to protect the substrate. ULTRA-GRIP sticks to the surface better than the National Brand, even when the finish is subjected to moisture.

Plywood

ULTRA-GRIP Premium

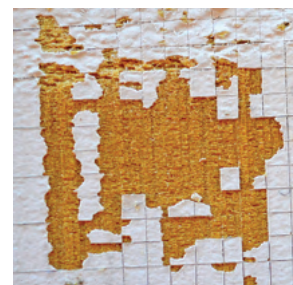

National Brand

Pine

ULTRA-GRIP Premium

National Brand

Test Method: A three mil drawdown of the paint being tested is applied to the desired substrate (glossy aged alkyd, chalky latex, metal etc.) and allowed to dry for 24 hours. After 24 hours, two 100 square sections are cut into the substrate using a Gardner Adhesion Knife. **Dry Adhesion:** For dry adhesion test, Permacel tape is placed firmly over the cut with a 2" overlap of the test area. The tape is then quickly removed at a 180 degree angle. The amount of paint that is removed from the substrate is evaluated and scored using ASTM OB - 5B rating (0 meaning complete paint removal from substrate and 5 meaning no paint removal).

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the Corporate Office by appointment.

Interior Cabinet, Door & Trim Primer

DECOPRIME®

Fast drying with
unmatched sandability

DECOPRIME is a premium, ultra-low VOC, water-based, wood primer for interior wood, hardboard, and wallboard. It is ideal for use on new wood cabinets, doors and trim.

Why DECOPRIME outperforms the competition

- :: Fast drying
- :: Exceptional sandability, adhesion and enamel holdout

Wood

Learn
more

SANDABILITY:

A primer that is easily sandable provides a smooth and uniform surface, allowing for maximum adhesion of a topcoat. DECOPRIME does an excellent job at sanding without gumming as compared to the competition.

DECOPRIME

DECOPRIME doesn't gum up the sandpaper while sanding.

DECOPRIME

DECOPRIME has better sandability compared to the competition and is easier to generate powder when it is sanded.

Regional Brand

Other primers gum up the sandpaper while sanding.

All test examples are high resolution photographs of the actual test results. The tests were conducted by Dunn-Edwards Laboratories and can be viewed at the Corporate Office by appointment.

Interior/Exterior Masonry/Bonding Primer

SUPER-LOC®

Maximum adhesion and performance for all surfaces

SUPER-LOC Premium Masonry/Bonding Primer offers excellent adhesion on a vast array of difficult-to-paint surfaces (see Product Data Sheet) in addition to alkali and efflorescence resistance on interior and exterior masonry surfaces.

Why SUPER-LOC Premium outperforms the competition

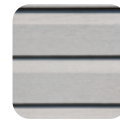

- :: Formulated with advanced resin technology, which improves adhesion properties, alkali and efflorescence resistance
- :: Easy to apply and dries fast
- :: Low odor and ultra-low VOC content

Masonry

Fiberglass

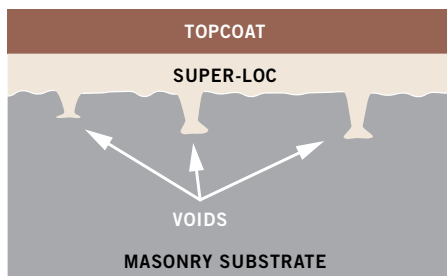

Fiber Cement

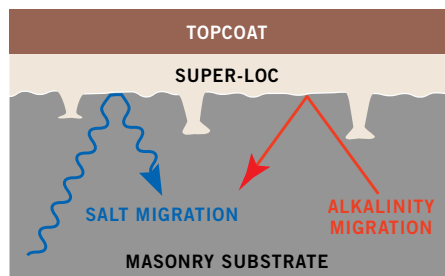

Hardboard

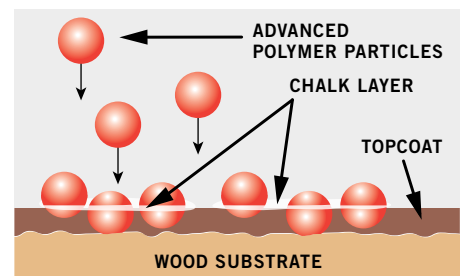

See the SCIENCE of EXCELLENT ADHESION, ALKALI & EFFLORESCENCE RESISTANCE:

Unique resins migrate into voids in the masonry substrate, which provides superior adhesion

High performance acrylic resin seals masonry substrate from salt migration (efflorescence) and provides excellent protection by suppressing alkaline migration to the topcoat

Advanced polymer particles penetrate chalky surfaces and adhere to the underlying substrate, which provides superior adhesion

These diagrams are not designed to scale and are simplified to illustrate what is happening on a microscopic level.

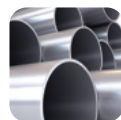

Interior/Exterior High-Performance Primer

ENDURAPRIME®Quick-dry corrosion
protection for steel

ENDURAPRIME is an interior/exterior high-performance, rust-preventative, acrylic metal primer formulated to provide excellent early flash rust resistance for quicker return to service.

Why ENDURAPRIME outperforms the competition

- :: Early flash rust resistance at high humidity
- :: Superior corrosion resistance on ferrous metal
- :: Fast drying

Pipes

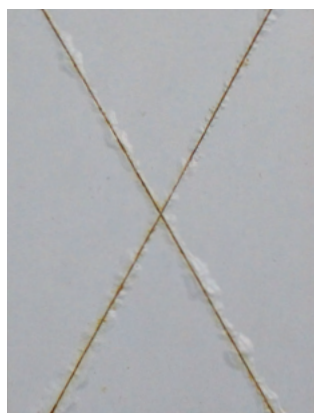

Metal

Steel

ACCELERATED CORROSION:

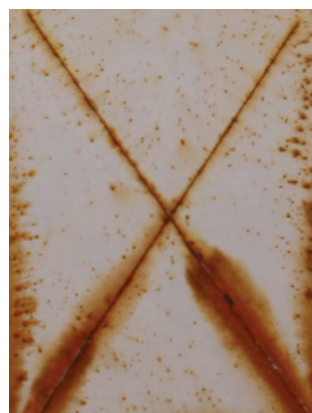

In comparison tests, we applied a single, 2 mil dry coat of ENDURAPRIME and leading rust inhibitive primers on ferrous metal. ENDURAPRIME clearly beats the Regional and National Brands, as their primers show significant rust and corrosion development.

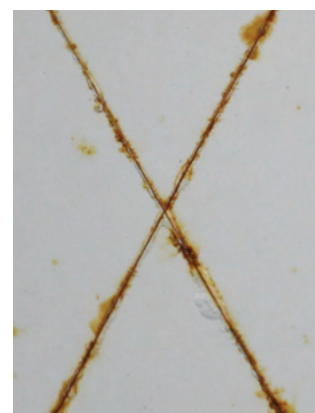

ENDURAPRIME

Regional Brand

National Brand 1

National Brand 2

Test Method: Coatings are applied to a 4 inch by 6 inch dull finish steel panel using a standard drawdown bar to a uniform film thickness of 1.5 to 2.0 mil dry per coat. After drying, a second coat is applied at the same thickness bringing the total film thickness to 3.0 to 4.0 mils dry. After the drying period, all panels were checked for mil thickness and scribed (cut into) with a four inch "X" on the face of the metal panel using a box knife. After scribing the panels, each set was placed into a salt fog chamber where the panels were subjected to a corrosive environment for 504 hours. Note: For the topcoat corrosion tests, panels were primed with the recommended metal primer for the competitive samples and with the ENDURAPRIME for the ENDURA-COAT.

PRIMERS

Drywall

PREP-WALL™

- :: Provides a smooth and sandable surface
- :: Minimizes texture variations from drywall face paper

PREP-WALL is a professional, ultra-low VOC (25 g/L), interior surface conditioner/primer that improves the quality of the drywall finish.

Sheen/Material #	UOM	Notes
Flat/PRWL00	5 Gal	

Masonry Bonding Primer

SUPER-LOC®

- :: Excellent adhesion
- :: Excellent alkali and efflorescence resistance
- :: Easy to apply

SUPER-LOC is an ultra-low VOC (50 g/L), high performance interior/exterior masonry/bonding primer for difficult-to-paint surfaces. *For more information please refer to page 30.*

Material #	UOM	Notes
SLPR00	1 Gal	
	5 Gal	

PRIMERS

Chalk-Binding

SURFACO®

- :: Excellent adhesion to chalky surfaces
- :: Good alkali and efflorescence resistance
- :: Low odor

SURFACO is an ultra-low VOC (10 g/L), chalk-binding primer that provides excellent adhesion on previously painted chalky surfaces.

Primers/Sealers

BLOCK-IT® Interior/Exterior Stain-Blocking Aerosol Primer

Superior hiding, stain-blocking, all-purpose primer seals in tough stains

- :: Seals and blocks stains caused by water, nicotine, smoke, tannin, pencil, ink, grease and felt marker
- :: Seals smoke and pet odor
- :: Use on interior/exterior wood, concrete, drywall and non-galvanized metal
- :: Sticks to hard-to-paint surfaces such as railings, shutters, glossy paint, glass, ceramic tile and outdoor furniture
- :: Sands easily and is perfect for sealing spackle drywall repairs and hiding dark colors
- :: Dries fast; recoat in 30 minutes

Notes:

* Interior Use Only (exception: B-I-N may be used for exterior SPOT-priming).

(1) Allow new masonry, plaster and stucco to cure before coating.

(2) For best results, allow Bulls Eye 1-2-3 to dry 24 hours before applying topcoat.

(3) Use appropriate cleaner to remove mildew.

(4) Only B-I-N can be used on floors.

Gallon.....	RG-VG7200-1.....	4	208	

Stocked at select locations

VandlClean Super Graffiti Cleaner is a low-VOC, low-odor, biodegradable, citrus-based product that dissolves paint, marker and pen ink without harming surfaces. It is safe to use on all surfaces including glass, plastic and metal. Spray it directly onto the affected surface, wait 30 seconds, wipe with a rag or use a soft brush, and finish with a water rinse or with a pressure wash. Recommended to be used with other Rainguard VandlGuard products.

The image features two dental applicators against a solid green background. One applicator is positioned diagonally from the top left towards the middle right, featuring a black plastic handle and a multi-lumen metal tip. The second applicator is in the bottom left corner, showing a wooden handle and a single-lumen metal tip that is bent at a 90-degree angle. The word 'APPLICATORS' is printed in white, bold, sans-serif capital letters across the middle of the image.

Brushes

TITANIUM-PRO™ Brushes

Dunn-Edwards Professional Paint Brushes

Crafted for Peak Performance Dunn-Edwards technicians have invested years in the research and development of brushes in conjunction with our lab's painting professionals and our materials suppliers. Together, we have achieved a level of application performance that is both unique and unprecedented in our industry using proprietary methods and thorough testing protocols. The result is a series of premium-quality brushes with the attributes pros depend on for smooth application and coverage.

AGATE

- :: Soft formulation
- :: Natural bristle/ox hair blend
- :: Specially suited for all oil-based paints

PERFECTA-PRO®

- :: Firm formulation
- :: Excellent loading and distribution of paint
- :: Delivers a smoother finish
- :: Provides improved coverage and hiding

SILKY-FLO®

- :: Semi-firm formulation
- :: 100% Natural black Chinese bristles
- :: Recommended for oil-based paints, stains and varnishes

SUMMERTIME-PRO™

- :: Firm formulation
- :: 100% Tapered, solid filaments
- :: Applies all paints smoothly
- :: Works well in warm weather

TITANIUM-PRO™

- :: Stiff formulation
- :: Maintains stiffness on warm days
- :: Specially designed for applying exterior paints

Determining the Correct Roller Cover

A factor to consider when choosing a roller cover is the surface you'll be painting. The general rule when choosing a roller nap is: the smoother the surface, the shorter the nap; the rougher the surface, the longer the nap. Kitchens and bathrooms generally have walls with a smooth finish, so they require a 1/4" to 3/16" nap. Bedrooms and hallways that may have a light textured surface require a 3/8" to 1/2" nap.

Check the chart for proper nap size recommendations.

NAP SIZES	SURFACE TYPES
1/4" to 3/16"	Smooth Surfaces: Metal, Drywall, Smooth Wood, Smooth Plaster
3/8" to 1/2"	Semi-Smooth Surfaces: Walls, Ceilings, Lightly Textured Drywall
3/4" to 1"	Semi-Rough to Rough Surfaces: Stucco, Medium Texture, Concrete Block
1 1/4" to 1 1/2"	Very Rough Surfaces: Stucco, Brick, Rough Shingles, Corrugated Metal

Roller Covers | Continued

Emerald Roller Covers

Versatile Use
Excellent for flat finishes, primers, stains and water sealers

High Performance
Performs well with oil and latex paints

Improved Pick-Up and Release
Special mix of thin and thick fibers for both improved pick-up and release and to prevent matting

Multi-Surface Application
Contains knitted fabric for high production on medium, rough and extra-rough surfaces

DUNN-EDWARDS

Color-Coded for Nap Size Identification

At Dunn-Edwards, we do our best to carry the products painting professionals need to complete their projects and make it easy to identify which product should be used for a specific job application. One way we do this is by color-coding our roller covers. Look for the color patch on the endcap of all Dunn-Edwards roller covers. Refer to the chart at right for nap size and corresponding color.

Size x Nap	Material#	Box Qty	Notes
Emerald Covers			
4" x 1/2"	E412	24	
4" x 3/4"	E434	24	
9" x 1/2"	E912	12	
9" x 3/4"	E934	12	
9" x 1"	E910	12	
9" x 1 1/4"	E9114	12	
Emerald Mini Covers 2-Pk			
6 1/2" x 1/2"	R612	24	

		1/4" PILE HEIGHT	Recommended for ultra-smooth surfaces like drywall and wood work
		3/8" PILE HEIGHT	Recommended for smooth and semi-smooth surfaces like drywall and light texture
		1/2" PILE HEIGHT	Recommended for semi-rough and rough surfaces like texture and concrete
		3/4" PILE HEIGHT	Recommended for rough and extra-rough surfaces like heavy texture and concrete block

Sheepskin Wool Roller Covers

Premium-Quality Merino Sheepskin

Our 100% handmade sheepskin covers are made from only the most premium-grade skins and are specially tanned to ensure the highest-quality product available

Clean End Product

Each cover is carefully trimmed and vacuumed to ensure a smooth finish every time

Strong, Resistant Core

Made of heavy-duty six-ply phenolic material and end-sealed, so it's impermeable to water and solvent-resistant, making it a longer-lasting roller cover

More Fibers Per Square Inch
Sheepskin covers can have up to eight times as many fibers per square inch as the best-quality synthetic covers, and give you two to four times more coverage, so you can spend more time painting and less time dipping

Dunn-Edwards Sheepskin Roller Covers Give You 168% More Coverage

Sheepskin Coverage
75 sq. ft.

Synthetic Coverage
28 sq. ft.

DUNN-EDWARDS

Dunn-Edwards Sheepskin Is Superior

Reason #1—Increased Productivity

Dunn-Edwards sheepskin roller covers provide more pick-up and release of paint in tests against synthetic roller covers. This increases your productivity and allows you to get the job done quicker.

Reason #2—More Durable

Dunn-Edwards sheepskin roller covers are more durable because of their superior quality construction and, with proper care, will last longer than synthetic roller covers.

Reason #3—Better Value

With increased productivity and more durability, Dunn-Edwards sheepskin roller covers are naturally a better value. See for yourself.

Basics of Airless Spray Tips

Choosing the right spray tip:

- :: Size the spray tip according to the maximum tip size supported by the sprayer
- :: Consider the paint/coating to be sprayed

TYPE OF COATING	TIP SIZE
Lacquer or Stain	.011 to .013
Oil-Based Paint	.013 to .015
Latex Paint	.015 to .019
Heavy Latex and Smooth Elastomeric	.021 to .025
Elastomeric and BlockFiller	.025 to .035

Hours of operation and services at store locations are subject to change.

“Sometimes, even if Dunn-Edwards is not spec’d on the project, for certain situations like metal surfaces, we’ll ask to use their product instead. The quality is just that good.”

The repaint of Market Square, a 5-story building taking up an entire city block, involved all of the building’s stucco, metal railings and trim. The 8-man crew worked in tight spaces and operated a boom lift in heavy pedestrian and vehicular traffic, so the job required considerable preparation and planning. Paint deliveries demanded clear communication and on-time delivery—with no hiccups. Among the job’s challenges was Schaper’s Representative being tasked with matching 13 colors from a diverse palette to Dunn-Edwards colors, which they executed perfectly. They used flat and semi-gloss SPARTASHIELD® exterior paint, and the customer commented on how good the project looked. “It’s the highest-quality paint out there and it just makes us all look good,” Schaper says.

“We have a liaison we work hand-in-hand with at the Dunn-Edwards® store in its manufacturing facility. It’s more like a concierge service we have with them.” —Danny Thomas

This project had numerous add-ons and extensions involving painting 350,000 sq. ft. of added space to an existing 600,000-sq.-ft. site to expand capabilities and capacity. A roughly 3-mile-long concrete wall was also built around the building. In total, the concrete tilt-up project involved more than 6,500 gallons of paint. The teams used Dunn-Edwards ACRI-HUES® flat paint for all exterior concrete and masonry wall surfaces, ARISTOSHIELD® paint in semi-gloss for all metal, and SPARTAWALL® paint in eggshell on all interior drywall work. With large jobs that have shifting needs and numerous add-ons, the ability to deliver the right product on time is key to the project going smoothly. Having a supplier that’s on their game helps.

YOUR SUCCESS IS OUR PRIORITY.
